

Figure 1

Figure 1 consists of two side-by-side bar charts, labeled (a) and (b). Both charts have a vertical axis representing 'Number of cases' ranging from 0 to 60 in increments of 10. The horizontal axis represents 'Year' from 1987 to 1996.

(a) This chart shows the number of cases for 'All cases'. The bars show a general upward trend over the decade, starting at approximately 15 cases in 1987 and reaching about 55 cases by 1996.

(b) This chart shows the number of cases for 'Cases due to *S. flexneri*'. The bars are generally lower than those in chart (a), starting around 10 cases in 1987 and peaking at approximately 35 cases in 1995 before slightly declining to about 30 cases in 1996.

Year	Number of cases
1987	15
1988	20
1989	25
1990	30
1991	35
1992	40
1993	45
1994	50
1995	55
1996	55

Year	Number of cases
1987	10
1988	15
1989	20
1990	25
1991	30
1992	35
1993	30
1994	35
1995	35
1996	30
